Mount door backbox.
A. Orient bevel of door backbox to match bevel of door as shown in Figure 3A.
B. Remove a bottom knockout (rear knockout must be used for wood door).
C. Pull 5" of field wire through knockout. Install strain relief.
D. Mount door backbox to door using supplied screws.

Figure 3A. Beveled edge of door backbox.

NOTE: Door backbox is required for wood fire doors. Rear knockout must be used.
