

Mill Shop

Mill workers can design and build custom wood products to fit any need; they bring projects to life with quality craftsmanship at a competitive price.

Completely Customized to Meet Your Needs

Whether you are remodeling a facility, refurbishing a laboratory, or just adding a desk or table, mill workers can create customized furniture to fulfill your needs. Rather than searching through catalogs for mass-manufactured furniture, let the Mill Shop design your next piece. Free estimates are available for any size project.

Expertly Crafted

The experienced staff takes great pride in the workmanship of their projects. Combining age-old woodworking techniques with the latest in equipment, the mill workers produce furniture that is built to last a lifetime.

Made with Quality Materials

Fine hardwoods, including oak, cherry, walnut, maple, and birch, can be stained to match the existing decor. Hundreds of laminates are available to fabricate countertops or European-style cabinetry. Water resistant materials are also available.
